

ABOUT US

Independence Oilfield Chemicals was founded in 2012 by a group of recognized cementing, stimulation and production chemical leaders who, collectively, possess over 275 years' experience in the oilfield chemistry. Our headquarters is located Houston, TX and we operate in the all major US basins including Eagle Ford, Permian, DJ, Bakken, Marcellus, Utica, and East Texas. We are committed to providing cooperative chemical design, development, technical field services, and manufacturing to satisfy your business requirements while continuously focusing on service quality and safety.

We pride ourselves on customer service. Our customers are our highest priority. We don't just supply oilfield chemicals, we supply solutions.

Our Team

Independence Oilfield Chemicals has assembled a team of oilfield leaders, experts, and chemists unmatched in the oil & gas chemical industry. The management of the company has a long history of working with oilfield chemicals, and is derived from the top level executive and technical talent at the major oilfield service companies.

Vision Statement

To be the industry's most experienced, proven and customer centric chemical company.

Mission Statement

To deliver superior economic value through complete transparency in technology, supply chain and business relationships.

Value Statement

With a holistic, "production view" towards completions, Independence Oilfield Chemicals develops basin-specific stimulation and production chemical solutions to:

- maximize production;
- preserve asset integrity;
- reduce unnecessary expense.

Quality Control

Our stringent quality control measures guarantee that our products exceed our customer's expectations and conform to all government standards for quality and safety. We use extensive testing to ensure that only products with the correct formulation and consistency reach our clients.

Health, Safety and Environment

At Independence Oilfield Chemicals, our aim is to be the safest and most environmentally conscious company in the industry. We have rigorous procedures and checks to ensure compliance with all required federal, state and local requirements.
