Home > Carbon Technologies

As the first U.S. manufacturer of activated carbon with 100 years of experience, our high performing products are used to capture fuel vapor emissions and to purify and decolorize liquids.

When you partner with us, you get high quality products and a reliable partner with the technical expertise to continuously innovate. Our ISO 9001, ISO/TS 16949 and Responsible Care® certifications give you peace of mind because our products are going to be consistent time and time again.
