Agricultural Chemicals Products

MWV agricultural products are designed to meet modern formulation requirements from dispersion stability to sunlight protection, for all dry and water-based systems.

Dispersants

MWV Specialty Chemicals is a leading global manufacturer of specialty lignin and lignosulfonate dispersants, tall oil fatty acids and their derivatives. From agricultural pesticide products to textile dye dispersants and dyestuffs chemicals, we develop and manufacture a myriad of specialty dispersants serving a broad range of markets.

Distilled Tall Oil and Mixed Acids

Our distilled tall oils and stabilized mixed acids are used as emulsifiers in the polymerization of synthetic rubber, metalworking oils, alkyd resins, anionic flotation reagents and asphalt emulsion additives.

Mineral Technology

MWV has supplied performance additives to the cement industry for decades. Our excellent raw material position and product synthesis capabilities have made our products the products of choice in masonry, plastic and stucco applications.

MWV Diacid 1550

Diacid 1550 is a co-emulsifier first and foremost. It is a unique product that can supplement additives in your formulation. It allows you to reduce the amount of emulsifier additives, anti-corrosion additives, and lubricity additives which saves you money.

Publication Inks Products

Our products are used to coat pigment particles resulting in glossy, vibrant printing ink manufactured by our customers in the graphic arts industry.

Rosins

MWV manufactures a variety of functional and intermediate chemicals based on tall oil rosins that are used in the manufacturing of rubber polymers, paper size, ink resins and adhesive resins. These products include tall oil rosins and rosin derivatives.

Tackifiers

Our products are the natural choice in tackifiers for adhesive products, the natural alternative to hydrocarbon tackifiers, solvent free and environmentally friendly.

Tall Oil Bio-Fractions

The Liqrene Series products are high-titer tall oil distillates or heads used in asphalt emulsions, metal and ore flotation and other fatty acid applications. Tallex is a dark bottoms product from tall oil fractionation used in asphalt compounds, cement and adhesive binders.

Tall Oil Fatty Acids

Tall oil fatty acid and its derivatives are used in the manufacturing of rubber, paints and coatings, soaps and detergents, metalworking fluids, mining and corrosion inhibitors.
